On July 30, 2019, Barbara Hill filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that she suffered “significant pain in her left shoulder bursitis” as a result of an influenza (“flu”) vaccination administered on October 14, 2016. Petition at 1. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On December 11, 2020, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent’s Rule 4(c) Report at 1. ("QAI") for a [SIRVA]; [P]etitioner has no history of pain, inflammation or dysfunction in her left shoulder; her pain and reduced range of motion occurred within 48 hours of receipt of an intramuscular vaccination; her symptoms were limited to the shoulder in which the vaccine was administered; and no other condition or abnormality was identified to explain her symptoms". *Id.* at 5-6.

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.
